

Key Benefits of FSC Certification

1. Increased revenue from customers purchasing FSC Certified Products
2. Be viewed as a company that supports responsible management of the world's forests.
3. FSC Certified wood products reduce the risks associated with illegally harvested, socially unsound or unsustainable timber sources.
4. Provide a credible link from certified forests through the manufacturing process to delivery certified products to the marketplace.
5. Support recreational and scenic enjoyment of forests, clean water and conservation of biodiversity and a vibrant and productive forest products economy that provides sustainable jobs.

The mark of
responsible forestry

Or company has been
FSC Certified since 1995.
SW-COC-000008

How to become FSC Chain-of-Custody Certified

1. Get FSC Certification bids. We recommend Rainforest Alliance's Smartwood Program
2. Develop site-specific FSC Chain-of-Custody Documented Control Procedures.
3. Train your company on how to purchase, receive, manufacture, store and sell FSC Certified products.
4. Have your company annually audited to maintain your company's FSC Certification.
